Mike said:

"Although any career has its ups and downs, I've never had a job I didn't thoroughly enjoy. My favorite has been my time with the Helena Public Schools. What a great group of administrators, staff and students to work for."

What I'd Like People to Remember Me For:

"For the most part I've always tried to be the best person I could be given the time and space. I've always enjoyed being around people and doing what I could to help them succeed. Rarely have I been disappointed."

"Life is a continual learning process and boy did I learn. As I look back I've found it's very important to love yourself, your family, your friends and fellow workers and never forget to tell people how much you love them."

To the Scholarship Recipient:

"Having a skill is so very important. Skills are hard to come by without training beyond high school or a GED."

"Be the best you can be and set goals that are realistic."

"I want this scholarship to be a start for you; I want you to be a happy, secure person who doesn't end up in a dead end job, living from paycheck to paycheck. I want you to always have a future ahead of you."
